MINIMUM CONTAMINATION

FOR GREAT AMERICAN COTTON GINNERS

At Tama, our mission is to empower American Cotton Ginnings with the tools and support needed to produce the finest quality American cotton.

Innovation of new technological solutions:

Tama Cut Indicator™ minimizes the risk of cotton contamination. Investing vast resources in new technologies to minimize contamination. Our formulation of tail adhesive for wrapped modules has proven itself in all weather conditions, to ensure minimum risk of cotton contamination.

Gin-Tailored Cotton Wrap

Designed with precision, innovation, and care, TamaWrap+ ensures the cotton ginning process yields lint cotton of unparalleled quality.

Built For Transportation

TamaWrap+ is less susceptible to tears from cotton stalks, snags from module chains or punctures as modules are moved.

Ginning Experts

The Tama USA team includes Ginning School graduates who understand the ginning process from top to bottom and have the ability to bring significant added value to ginnings across the country.

Gin Trials

Our R&D division works tirelessly to adjust TamaWrap to the specific needs of the American Ginning Operations.

COOPERATION

FOR CLEAN AMERICAN COTTON

OUR EFFORTS

Cooperating to help eliminate contamination in the American cotton sector

Our efforts do not stop at wrapping cotton - Not in the field after picking, nor in the Gin after unwrapping. We want clean, high-quality American cotton, and we believe it is our responsibility to find solutions throughout the chain.

TamaWrap+® Premium Yellow and/or Pink is
Approved Round Module Wrap Product
Meets ASABE S615.2 Cotton Module Cover Material Performance
Approved List Maintained by the National Cotton Council

TAMA ASSIST

For Great American Cotton Producers

We know that cotton farming can be full of challenges, from machinery breakdowns to optimizing the harvesting process - its not just about fixing problems when they arise. We're here to help you make high-quality American cotton, that's what we're all about!

For Great American Cotton Ginners

Recognizing the mutual benefits of improving cotton quality, Tama has partnered with various gins across the United States to implement educational programs and share best practices focusing primarily on the exchange of knowledge regarding the handling, storage, and processing of cotton to minimize the risk of contamination.

TamaWrap®

BETTER COTTON WRAP FOR

SUSTAINABLE AMERICAN COTTON

Nothing goes to waste

Thanks to in-depth research and new technology implementations, U.S. cotton production is continually improving, maximizing efficiencies while minimizing inputs, and we follow suit.

Zero waste in production

Our production sites around the world produce our premium cotton wraps, while striving for minimal depreciation in the manufacturing process, so nothing goes to waste in the process.

Fully Recyclable

TamaWrap® is made of Linear low-density Polyethylene (LLDPE), which can be efficiently re-purposed into new products. Recycling our plastic wraps supports the development of a circular economy.

Easy to collect & recycle

After their removal in the gin, The TamaWrap® are collected, compressed and sold to recyclers, thus creating an extra income for the gin and maintaining the circular recycling chain.

Making it better

Our cotton R&D teams constantly develop innovations that set new standards for improving our environmental footprint with more efficient and eco-friendly solutions for our industry.

RECYCLING DOCUMENT

General material description for recyclers

TamaWrap® consists predominantly LLDPE with the following unique aspects on each wrap that may impact the recycling process:

- Approximately ½ of the surface is coated with an adhesive type material (amount of adhesive type material is less than 3.5% of the film).

- Approximately 8' x 4" of polypropylene tape adhered to the middle of the wrap (approximately 33 feet from each end of the wrap).
- 5 Identification labels, 4 of which have RFID tags embedded in them.
- Approximately 8' x 7.7" of polyester material adhered to the leading edge of the wrap.
- Approximately 8' x 7.7" of adhesive material that secures the tail.
- Each wrap portion weighs approximately 10 lbs (4.3 Kg).

A journey from field to fabric

Throughout the Cotton Belt, from the seed, through the field via the gin, and to the mill, U.S. cotton is traceable, transparent, and efficient.

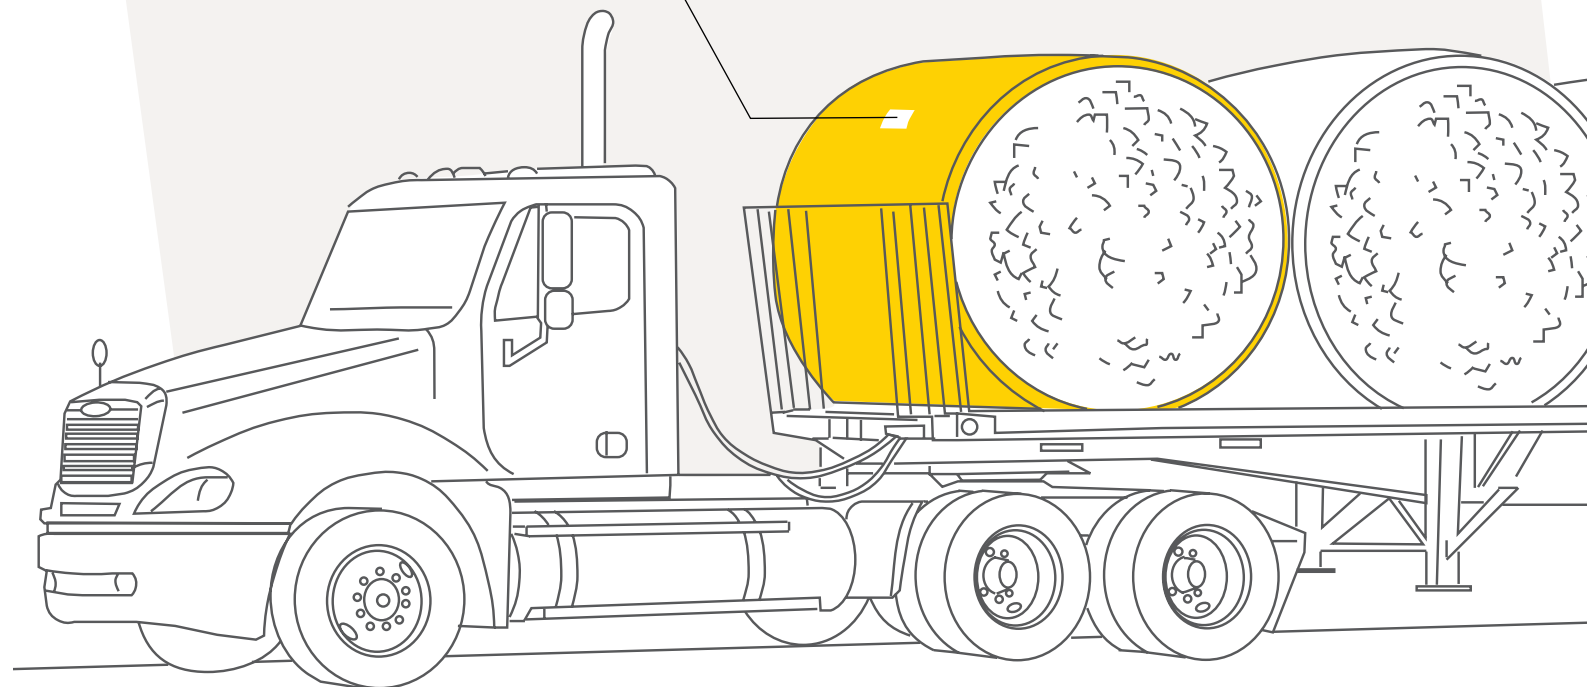

RFID

Each TamaWrap+[®] includes 4 RFID tags for unique module identification, ensuring full traceability and association of ginned bale data with the seed cotton module and field.

It integrates with John Deere Harvest ID, Cotton Pro, and the John Deere Operations Center, leading the way in traceable cotton production.

WRAP

Radio Frequency IDentification (RFID):

Every TamaWrap includes 4 RFID tags

Tama Cut Indicator™:

Helps in locating the recommended cutting zone in order to minimize the risk of cotton contamination.

Wrap identification:

Each TamaWrap+® Premium has a unique serial number, located on the white separation label

The TamaWrap+® Premium Z-LOCK® wrap portion concept:

TamaWrap+® Premium is made of pre-cut wrap portions in order to eliminate the potential of plastic fragments.

The Z-lock® system connects and separates each individual portion on a roll, so the roll is made from 24 “ready to use” portions.

The Z-lock® system assures the next portion is ready to feed correctly.

ROLL

24 Portions of Wrap per roll

Plastic core:

Every core is marked on its left hand side, to assist correct installation:

- Black dots or blue stripe on the core.
- A label inside the core.

Identification:

Each roll has its own ID number located inside the core, and on the leading edge of the 1st TamaWrap+® Premium.

Roll Weight:

Approx. 220 lbs (100 kg)

Roll Width:

9 ft. 2 in. (2.8 meters)

Roll Diameter:

10 in. (25 cm)

PALLET

9 rolls per pallet

216 Portions of wrap per pallet

Weight
2095 lbs (950 kg)

Pallet Order, Distribution, and Product Support (Tama USA):

- Shipping Damage must be notated on Delivery Receipt - at the time of delivery and filed to transport company within 3 days

TamaWrap Storage Requirements:

- Store under roof in an enclosed structure and avoid exposure to sunlight and moisture
- Double stacking of pallets is permissible with proper handling equipment
- To be used within two seasons

Pallet Handling Recommendations:

- HANDLE ONE PALLET AT A TIME
- Recommended lift capacity: 4,400 lbs (2 tons) forklift
- USE LONG FORKS when handling pallets from its narrow end to minimize damage
- Long Forks length: 6 ft. 6 in. (2m)
- USE PALLET PULLER when unloading from truck
- Pallet pullers available from material handling supply houses
- Wrap can be punctured or torn by improper handling or loading/unloading procedures
- Wrap can be damaged by careless handling
- Make sure that all sharp edges and protrusions on hauling equipment are eliminated

TAMA LIMITED WARRANTY

for TamaWrap® products

Tama warrants and agrees that the individual wrap portion by individual serial number used in John Deere Round Module Cotton Harvesters sold hereunder shall be free of defect, in workmanship and/or materials, for a period of 24 months following the first delivery of TamaWrap® to the Buyer provided that:

The TamaWrap® is kept in its original packaging.

The TamaWrap® is stored under cover and is not exposed to extreme heat, direct sunlight or moisture during storage. Double stacking of pallets is permissible with proper handling equipment.

The TamaWrap® is used in accordance with user manuals or other instructions furnished by Tama.

Request for warranty by individual serial number must be requested in the use season as the incident occurs.

Tama's responsibility under this Warranty regarding TamaWrap® found to be defective will be to replace the defective TamaWrap® with appropriate substitute TamaWrap® free of charge or to refund to dealer the price paid for such TamaWrap®.

Tama will not be responsible for and will have no obligation to make repairs or replacements required, in whole or in part, in case the conditions above were not fulfilled.

Round modules wrapped with TamaWrap® can be staged outside for a period of up to 6 months.

REPAIR, REPLACEMENT OR REFUND IN THE MANNER PROVIDED ABOVE WILL CONSTITUTE FULFILLMENT OF ALL OF TAMA'S OBLIGATIONS WITH RESPECT TO THE QUALITY AND PERFORMANCE OF THE PRODUCTS. TAMA HAS MADE AND MAKES NO OTHER WARRANTIES WHATSOEVER WITH RESPECT TO THE PRODUCTS, EXPRESSED OR IMPLIED.
